This idea was created by three friends with a passion for experimentation in support for agriculture. Many years of experience in the field and carrying out trials with new

- *fungicides,*
- *insecticides,*
- *miticides,*
- *nematicides,*
- *fumigants,*
- *slug pellets,*
- *herbicides,*
- *fertilizers,*
- *growth regulators,*
- *varietal screening,*
- *microbial consortia,*
- *water absorbent*

The trials are conducted in accordance with the main international guidelines: EPPO, CEB, ISO, BS, IRAC, IOBC / WPRS, AFNOR. Sele Agresearch Srl works on the main crops of interest in agriculture, forestry and ornamental in the open field or in a greenhouse at the experimental fields in local farms.

Thanks to our geographic position, we have specialized in the world of the vegetables "baby leaf", and we have also carried out various trials, demonstrating tests, testing of plastic, and all that is used for the cultivation in the sector "Ready to eat".
